

Lamaload Reservoir – Route Two

For Satnav use Hooleyhey Lane SK10 5XL. Base camp (30px red dot on the map) is the spacious car park (SJ 972 750 – Elev: 308m) or a nearby lay-by on the same side if car park closed. If the car park is ever closed (rarely) the site is not closed and public footpaths abound.

Follow the 15px blue dots following the public footpath signs and the Circular Route signs when seen.

A short route but how long it takes depends on what you are hunting on the day. You will pass through a surprising variety of terrain including water and is well worth the effort.

Nothing to stop you taking small detours into wooded bits for the fallen logs and small wetland which you will pass, as well as the dam itself.

Route (GPS) = 3.9 km
